|-------------------------------|--|
| Information requested: | Mapping of the latest Care Quality Commission (CQC) rating for Havering CCG practices by Locality. |
| Requested by: | Locality Design Group |
| Purpose: | To support the improvement of the quality of primary care in Havering CCG |
| Date Completed: | 24th August 2017 |
| Analysed by: | Anthony Wakhisi (Principal Public Health Specialist) |

Summary of Results

The care quality commission (CQC) is the independent regulator of health and social care in England. CQC carries out regular inspections and assessments of health and social care institutions. The exercise is based on five broad questions namely:

- Are they safe?
- Are they effective?
- Are they responsive to people's needs?
- Are they well led?

Following assessments, institutions are rated and recommendations made to help them address raised issues and improve future rating. There are mainly four ratings as follows:

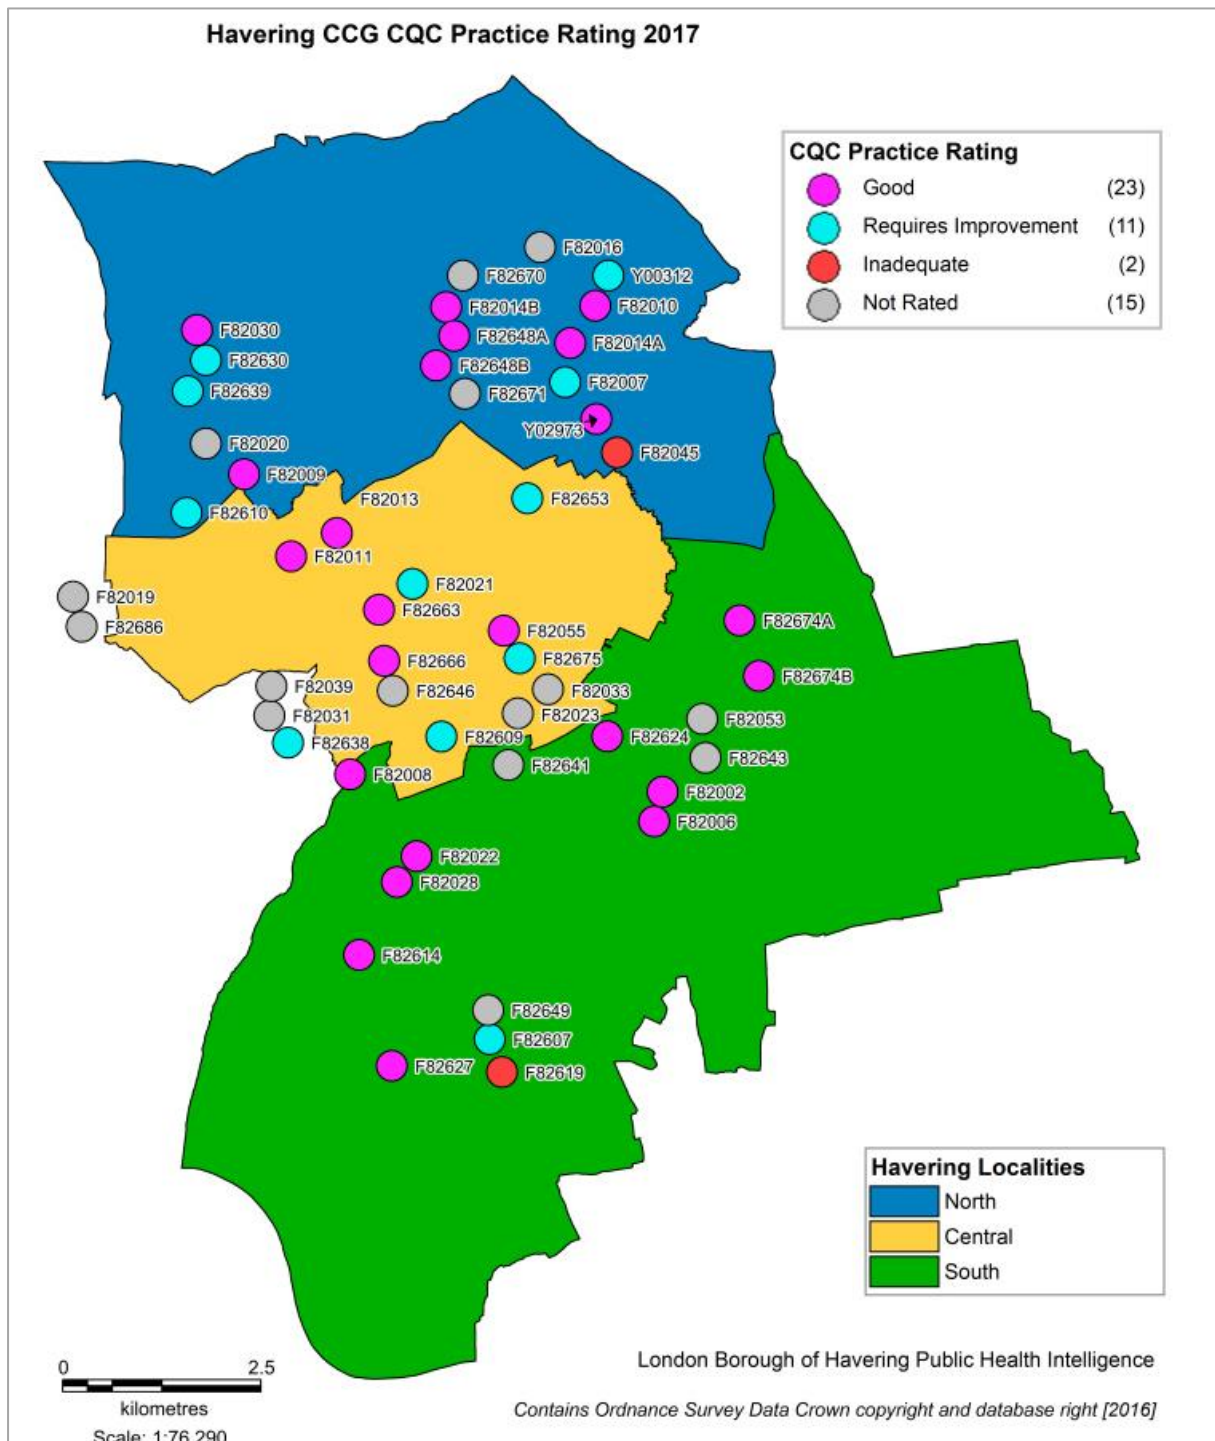

| Rating | Explanation |
|----------------------|--|
| Outstanding | The service is performing exceptionally well |
| Good | The service is performing well and meeting expectations |
| Requires Improvement | The service is not performing as well as it should and must improve |
| Inadequate | The service is performing badly and action has been taken against the person or organisation |

The map below (Figure 1) shows ratings for 36 Havering CCG practices that were inspected / assessed and reports published in June 2017.

Most practices (23/36) were rated as good. About a third (11/36) mainly in the Central and North localities were rated as requiring improvement. Fifteen practices were not assessed.

Two practices (F82045 and F82619) were rated as inadequate. Appendix 1 shows ratings for all Havering practices and full reports for each practice can be accessed at: <http://www.cqc.org.uk/what-we-do/services-we-regulate/doctorsgpps>
